Name:**Sex/Age:****ID No:****Ward/Bed:****HN:****Dept:**

Previous Transfusion: Yes/ No / Unknown

If yes, date of last transfusion: _____

Untoward reaction: Yes/ No

Alloantibodies if known: _____

Latest Hb: _____ g/dL

Latest platelet count: _____ x 10⁹/L (if request Platelets)

PT: _____ INR: _____ APTT: _____ (if request Plasma)

Body weight: _____ kg (for neonate CMV negative blood)

Diagnosis: _____

Indication for transfusion: _____

 Doctor: _____
 (Print name, CMS code Signature)

Date Request: _____

 Specimen _____
 taken by: (Print name, CMS code Signature)

Specimen collected on (Date & Time): _____

 Checked by: _____
 (Print name Staff code Signature)
Product required (each item use one form)

- ☐ T&S, Red Cell / Whole blood _____ units
- ☐ T&S, LRF (arrange in advance) _____ units
- ☐ Platelets _____ units
- ☐ Plasma _____ units
- ☐ Other : _____

Degree of Urgency

- ☐ Desperate (# _____ units of **UNMATCHED** blood is needed immediately)

*** I understand & shall be responsible for the risks involved.**

Doctor: _____

Signature: _____

- ☐ Urgent

- ☐ Non-urgent

- ☐ Reserve for OT on _____ am / pm

FOR BLOOD BANK USE ONLY**Lab No.**

Blood Group: _____ Rh-D : _____ Done by : _____/_____

(LIS record: CMC ABO/Rh: _____ Previous ABS: _____) (BTNS record: _____)

Antibody Screen: ☐ Negative, valid till 11:00 am on _____☐ Positive, Ab found : _____ Done by : _____

 LIS= Laboratory Information System
 LRBF= Leucocyte Removed By Filtration
 T&S = Type & Screen

Instructions

Fill in the request form legibly and properly. It is the responsibility of the doctor who makes the request to ensure all the information in the form is correct and complete. **An improperly filled form will be rejected. Blood Bank will not be responsible for any resulting delay.**

Doctor, specimen-taking staff and counter-checking staff should print his/her name and CMS code, then sign.

Sample must be freshly taken and reach Blood Bank within 12 hours from time of specimen collection.

If the patient is **less than 120 days old**, mother’s sample (4 mL EDTA blood) is required in addition to the baby’s sample. (Please refer to Transfusion Guidelines)

For **platelets, plasma & cryoprecipitate**, only blood grouping is required. If there is previous T&S result, no blood sample is required. Otherwise, send 4 mL EDTA blood for blood grouping.

In emergency, if **unmatched blood** is required for immediate transfusion, the doctor should acknowledge the potential risks involved by putting in his/her name and sign. **Blood sample is still required for T&S.**
